

Sexual Assault Awareness Month (SAAM) was first observed nationally in April 2001. This month has been nationally recognized by many organizations around the nation through awareness activities and events. According to the US Department of Justice National Crime Victimization Survey, "every two and a half minutes, somewhere in America, someone is sexually assaulted." SAAM hopes to increase awareness about the implications of sexual assault in our community and promote activism to end this pervasive social problem.

Building Communities Free of Domestic Violence and Sexual Assault
